### Brief Introduction

XY-PG280 series Digital Pressure Gauge is low power consumption and optional wireless output, Peak value record, sanitation standard, wireless communication protocol is optional GPRS, LORa-iot, NB-iot. The high precision pressure sensor was built-in, quick response time to display accurately in real time, at the same time it has high precision and long-term stability; stainless-steel shell and joint with good shock resistance, thus it is suitable to measure gas, liquid, oil and other stainless steel without corrosion medium

These series digital pressure gauge is equipped with large-sized LCD display, it's easy to read data on site, at the same time upload record to cloud server, upload rate can be adjusted from 1 minute to 24 hours.

It's a real perfect wireless digital pressure gauge for Fire Water Pipe Network, Fire Alarm Station, Fire Pump Room, Water Supply, Petrochemical and Others filed required remote monitoring. It is alternative for the system involved by pressure transmitter, transmission module and power distribution box, consider its small size, convenient installation and cost-effective. They powered by Battery, 24VDC power supply is optional.
